

RULES OF ENTRY

APPLICATION BY PEDIGREE

1. **JACKS, JENNETS and GELDINGS** of any age may be accepted to registry without regard to measurement when their sire and dam are registered with the **AMJR/SJJR**. **EXCEPTION(S)** explained as follows:
 - a. The registry reserves the right, at any time, to visually inspect an animal for which the application to registry by pedigree is submitted.
 - b. The registry also reserves the right, at any time, to require a certificate and/or affidavit from a licensed veterinarian certifying height, size, color and/or age of an animal for which acceptance to registry by pedigree is being sought.
2. Application must include name of animal, color, sex, date of foaling and name and address of breeder and owner.
3. In registering foundation stock, give name and **AMJR/SJJR** registration number of sires and dams as far back as possible.

APPLICATION BY MEASUREMENT

1. **JACKS MUST MEASURE NO LESS THAN 14.2 hands**, standard measure, in height; at least **61 inches around heart girth**; and at least **8 inches at cannon bone** (measured **around** cannon bone midway between the knee and fetlock).
2. **JENNETS and GELDINGS MUST MEASURE NO LESS THAN 14 hands**, standard measure, in height; at least **61 inches around the heart girth**; and at least **7-1/2 inches at cannon bone** (measured **around** cannon bone midway between the knee and fetlock).
3. When applying for registry by measurements, submit **THREE (3) PHOTOS** with the application showing the entire animal clearly, front, rear and side view.

 - a. visually inspect an animal for which application by measurements is being submitted;
 - b. require a signed certificate and/or affidavit from a licensed veterinarian, stating the height, size, color and/or age of an animal for which application by measurements is being sought;

The registry reserves the right to deny acceptance to registry for animals of questionable pedigree and/or breed characteristics.

EXAMPLE: A burro cross is not a characteristic of this breed. An animal bearing the burro cross is not eligible for acceptance to registry.

Animals registered before maturity, are issued a certificate that includes no measurements, and is considered to be a temporary registry entry. A registry update form is required to be submitted when the animal reaches maturity (typically at five years of age). Upon receipt of the update, and verification by the AMJR Registrar that the animal meets the registry requirements, a permanent certificate of registry is issued.

Should any person or persons knowingly impose a fraudulent pedigree and/or certificate of measurements on this registry, he or they will never be allowed to enter another **JACK, JENNET or GELDING** in the records of this registry.
